NPIC/P&DS-71/65
19 February 1965

MEMORANDUM FOR: Chief, Support Staff, NPIC

THROUGH : Chief, Logistics Branch, SS

ATTENTION :

[REDACTED]

SUBJECT : Installation drawings for 12-and 24-inch
Roller Transport Processors

1. Enclosed are one of each drawing, numbers 1-120-E-661 and 1-120-E-1149 for the [REDACTED] 12-and 24-inch processors to be delivered in the summer of 1965; also included are data on imposed heat load and air discharge from the dryers of each of the processors.

2. In reply to your question of 17 December 1964, regarding the requirements of the electrical disconnection ahead of the main circuit breakers on the machines; there is no requirement for this disconnection, other than to isolate the main breakers for initial hook-up.

3. This data is in addition to that already supplied on the Installation Engineering Form. If you require additional technical data on this project please contact [REDACTED]

Assistant for Plans and Development
